

Surround Panner + Quadraphonic Set Up for Ableton Live

Set the Ext. Out for the speakers to pairs 1/2 & 3/4 on the Surround Panner Live Device. Remember you need one Surround Panner for each audio track. Once placed, you can position your audio in the quadraphonic field. Remember, you can record automation for each Surround Panner device if you want your audio to move around the room.

In each track's header set the output to **Sends Only** as pictured above
